JOURNAL OF LANGUAGE AND POLITICS

The Journal of Language and Politics represents a forum for analysing and discussing the various dimensions in the interplay of language and politics.

Therefore, we would like to announce that the two most recent issues of Journal of Language and Politics provide a set of fascinating theoretical papers as well as intriguing multidisciplinary analyses of the current and historical developments in Europe and beyond.

Issue 9:3 opens up with a theoretical paper on the notions of society, polity and language community and is followed by a set of analyses of media and political language in such contexts as: Turkish accession to the EU, the H5N1 bird-flu hype in public debates in mid-2000s, constructions of Jewish identity in the famous Scholem-Arendt exchange of the 1960s, or intricate logic of the contemporary Israeli peace and academic discourse.

Special Issue 9:4, that is devoted to 'Discourse and Socio-Political Transformations in Contemporary China', provides a range of critical analyses of contemporary Chinese media and political discourses from a set of novel perspectives.
